Acumen, LLC conducts policy research in support of federal, state, and local health care programs. We leverage our vast data resources to improve information available to policy makers on topics such as drug and vaccine safety, health insurance markets, value-based purchasing, and health care fraud.

Data and Policy Analysts hold key responsibilities in providing analytical support for health care policy research projects.

- Research and interpret policy
- Manage and analyze data
- Create and report descriptive statistics
- Interpret study specifications, research findings, and quantitative analyses
- Conduct econometric and statistical analyses using statistical software (SAS, STATA, R)
