Acumen, LLC conducts policy research in support of federal, state, and local health care programs. We leverage our vast data resources to improve information available to policy makers on topics such as drug and vaccine safety, health insurance markets, value-based purchasing, and health care fraud.

Data and Policy Analysts hold key responsibilities in providing analytical support for health care policy research projects.

- Research and interpret policy and communicate findings to multiple audiences
- Coordinate project activities
- Interpret study specifications, research findings, and quantitative analyses
- Specify econometric and statistical analyses
- Prepare project reports, memos, presentations, and proposals
