City, State Zip Code

Dear Search Committee Members,

Introduction State the position for which you are applying. In one or two sentences introduce yourself and include your dissertation title, chair, and degree completion date. You can end this paragraph by explaining the topic and findings of your project and the fields in which it intervenes which should include the field(s) to which you are applying.

Dissertation/Thesis Give a slightly more detailed version of your project's main findings – this can include methodology as well as a snapshot of what you're examining. Follow this up with a statement about how your work extends or corrects existing scholarship. What gap in the field do you address? Provide a short overview of the dissertation trajectory that includes where you begin and where you end. If you have publications from your dissertation or thesis, mention the most impactful and relevant manuscripts.

Future Research This paragraph is about your future research, productivity and your ability to earn tenure or promotion. Outline your planned future projects as they relate to your research interests, highlighting your range and focus – and how you can further complement departmental offerings. Clarify who your audience is by specifically identifying journals and presses you plan to submit projects to, to further demonstrate your research productivity. *For a teaching-focused position or for shorter cover letters, you might have a single paragraph on research that covers your dissertation, publications, and future research plans.*

Teaching Briefly state your approach to teaching or pedagogical orientation. Give one or two examples that demonstrate your teaching philosophy in action. These examples should not replicate the examples you use in your teaching statement/philosophy. Tailor the examples to the position, thinking about the size of classes and topics you would be teaching if in this position. Try to demonstrate similar teaching examples.

Fit This is where it pays to research the department and school to which you are applying. Consider what you know and why you fit into this department. You could list specific courses you can teach or additional departments and institutes you could work with. It is important to show how your research and teaching complement current course offerings and/or departmental initiatives. For new and growing fields, you might find that the department doesn't have any current course offerings or research groups related to the field they are hiring for, which is why they are hiring for that position. In that case, feel free to pitch the kinds of courses you would like to teach including at least one lower division course and one advanced undergraduate/graduate student course, and research groups, programs, or initiatives you could contribute to. You may also want to consider how you might fit into the school and the community if the department encourages interdisciplinary research and/or community connections.

Closing Thank the hiring committee for their consideration and emphasize your interest in the position by giving a reason specific to the school/department. Note which materials you've included in your application and state your availability for interviews – this usually means you will be at the conference where interviews will be held.

Sincerely,
Your name typed

Use university letterhead specific to your department. Keep in mind that this is the only document you will prepare that requires official letterhead.

If you cannot find the name of the contact, you can address the letter to the search committee.

The teaching paragraph can be a great place to discuss your commitment to diversity.

Strong letters incorporate fit throughout the letter, where appropriate, and use this section to speak to specific fit issues that are not covered in research or teaching.
